ELAN1 GOVERN · FRONT END · CHANGE REPORT

Screens now change by plan and by role

29 October 2026. Built with a multi-agent workflow: a shared core, four page areas in parallel, an independent check of each area with every gap fixed, and a final type-check, build and test run. Then verified by signing in to the running app. The public site was not touched, and pricing is unchanged.

What is different now

- **The menu follows the plan.** Screens the organisation's plan doesn't include are no longer in the menu: no tags, no previews. An upgrade makes them appear at once. The plan chip (for example "Guarded · L1") shows in the top bar on every page.
- **The menu follows the role.** An approver sees 14–15 screens, a viewer 25–29 and an auditor 22–26, against 37–41 for an owner. Typing the address of a hidden screen shows "Your role cannot open this".
- **Pages follow both.**
  - Buttons a role can't use are now hidden, not greyed out.
  - Sections of higher plans are removed.
  - Links to screens the person can't open become plain text.
  - Upgrade prompts appear only to the owner, as one short "Change plan" line.
- **Today follows the role.** An approver's Today starts with "Waiting for you": the approvals for their groups. The auditor lands on the Auditor workspace.

1. Menu size by plan and role (tested in the app)

PLAN	OWNER	ADMIN	APPROVER	VIEWER	AUDITOR
L1 Guarded	37	37	14	25	22
L2 Attested (+ Timestamps, Verifier profiles)	39	39	14	27	24
L3 Proven (+ Autonomy, Disclosure)	41	41	15	29	26
Sovereign	41	41	15	29	26

Counts are menu items, not counting section headings and the footer. Higher plans add screens; they never take any away.

2. What each role sees

ROLE	MENU (L1 EXAMPLE)	NOT IN THEIR MENU
Owner	Everything in the plan, including Meter, People and roles, Keys, Organisation, Deployment and Assurance levels	Higher-plan screens only
Admin	The same menu as the owner	Billing actions (order, cancel, change plan) are hidden on the Meter page
Approver	Today, Approvals, Reviews, Not done, Alerts, Incidents · Records, Activity, Rulebooks, AI inventory, Assessments · Agents, Agent map (+ Autonomy at L3) · Refusals	Approvers, Channels, Connectors, packs, erasure, consent, declarations, Keys, People, Organisation, Deployment, Path to production, Notices, and every Assurance screen except Refusals

Viewer	Read-only: Work queues, Records, Agents, Agent map, Overview, Proof, Chain, Refusals, Coverage, Counterparties, Assurance levels	Approvers, Channels, Keys, People, Organisation, Deployment, Path to production, Notices, Meter, Exports, Evidence requests
Auditor	Lands on the Auditor workspace · Records door · Agents, Agent map, Keys (read-only) · the Assurance door without the Meter	The whole Work door, People, Organisation, Deployment, Path to production, Notices, Meter

---

3. Checks

CHECK	RESULT
In the running app: 8 sign-ins (L1 owner, admin, approver, viewer, auditor; L2, L3 and Sovereign owners)	• **Menus:** they match the table above. • **Keys:** typing the address of the Keys page as an approver or viewer gives "Your role cannot open this". • **Disclosure:** for an L1 admin, viewer or auditor it gives "Not part of this organisation's plan"; L1 owners see the preview. • **"Add agent":** hidden for the approver, viewer and auditor.
Independent check of each page area	33 gaps found across the four areas, all fixed.
Type-check, production build, 78 scripted checks, link check (726 link targets)	All pass; 0 dead links.

---

4. How to see it yourself

- **Open the app.** In the browser panel, choose the tab whose address starts with `localhost:5190`, not a PDF tab. Reload it if it was already open.
- **Switch person.** Open the account menu at the top right and choose Sign out. On the sign-in page, pick a demo account from the **Demo accounts by assurance level** list; one click fills it in. Try:
  - Venkat Iyer (approver, L1);
  - Meera Shah (viewer, L1);
  - Kavita Desai (auditor);
  - Dr Lakshmi Pillai (owner, L3).
- **Compare.** Look at the left-hand menu and the plan chip in the top bar. They change with each person and each organisation.
